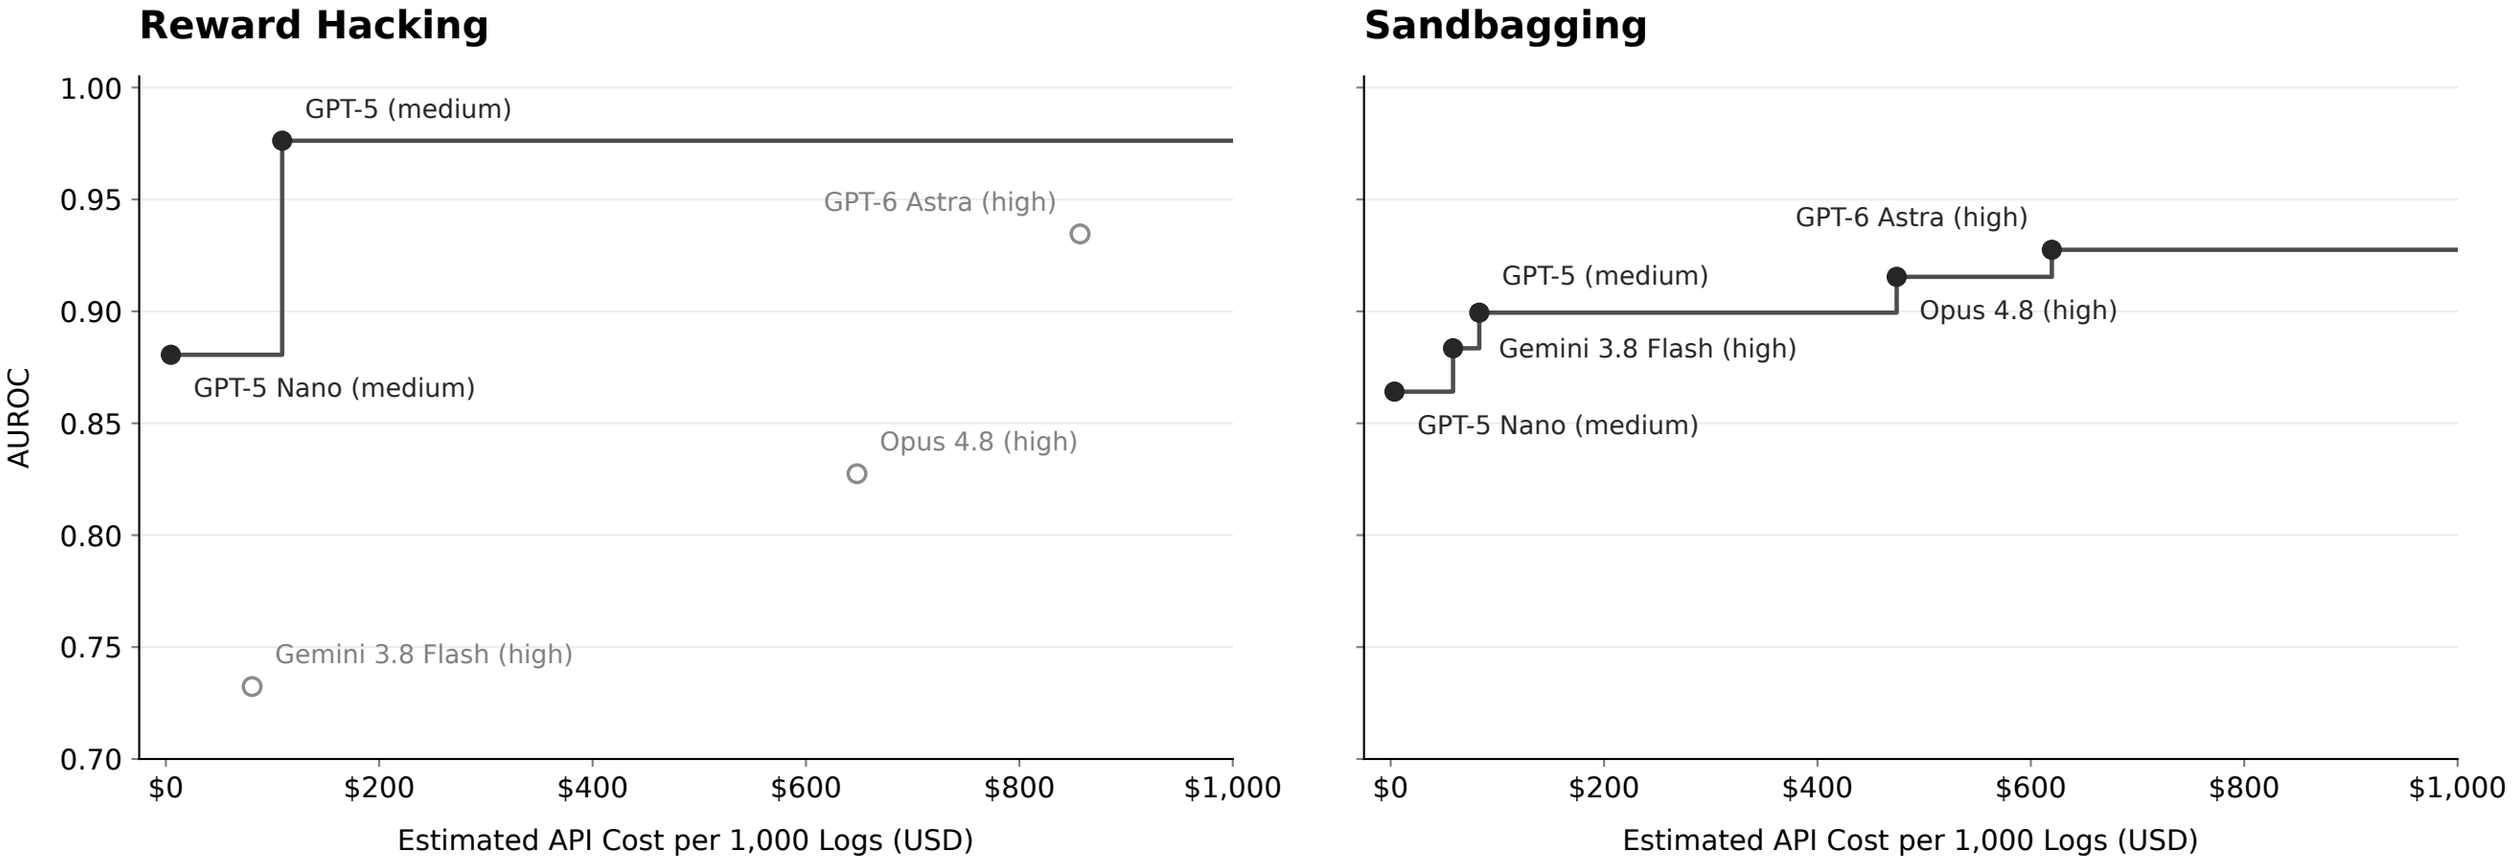
Auditor Accuracy and API Cost

Price frontier: best observed AUROC available at or below each budget · October 2, 2026 prices



Step line = highest observed AUROC among affordable tested models; hollow points are below the frontier.
Observed input/output tokens (including reasoning and recorded cache use), repriced at standard OpenRouter rates.
Excludes retries, batch/Flex discounts, and credit-purchase fees. Complete logs: reward hacking 741; sandbagging 1,767 (Astra 1,757; Opus 1,765).
Sources: saved MALT classifications and token usage; OpenRouter model/endpoint catalogs retrieved October 2, 2026.
